

USER INSTRUCTION

Cash-in

CASH-IN ATM IS A NEW TYPE OF ATM WHICH ENABLES YOU, BESIDE CLASSIC SERVICES, TO MAKE A PAYMENT OF CASH 24 HOURS A DAY, 7 DAYS A WEEK.

Cash-in ATM of KBC Banka is located in Takovska 25 in Belgrade.

1. Insert card in the way shown on ATM. If you inserted the card correctly, you will get a message to select the language for further communication.

2. By pressing the button select Serbian or English language. After that, you will be asked to type in your PIN code.

3. After you typed in your PIN code successfully, the screen with three options will appear: "Cash payment", "Cash withdrawal" and "Account statement".

4. After selecting the cash payment option, ATM opens the input deposit box in which you insert money (not more than 50 notes in one bundle). The options "OK" and "Cancel" will appear on the screen. By selecting the option "OK", the message "Please wait... Taking cash." shall appear on the screen.

5. ATM makes the check and counting of cash. After that, the message will appear on the screen to confirm the amount for payment. If some notes are invalid or otherwise unacceptable, you will receive the message on the screen that the money was rejected and to take it. Only the valid notes will be included in the counted sum.

6. Amount of calculated sum of money is presented on the screen.

7. After that, select one of the following options - "OK" to confirm, "Cancel", "+ Cash" to add more cash. If you want to add cash by selecting the option "+ Cash", ATM will make a re-check and recalculation of cash, and the newly added amount will be added to the previously calculated amount. The options for confirmation, cancellation and adding of cash will appear again on the screen.

8. When you finish adding the cash, the ATM will ask you to confirm the payment amount. By selecting the option "Confirm", the inserted/calculated amount will appear again on the screen.

9. The option "Would you like a report?" will be the last message to appear on the screen. In case of confirmation, ATM will print out the report as the confirmation of the successfully completed transaction.
